DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 25-44 have been rejected under 35 U.S.C. 103(a) as being unpatentable over the Diagrams for Faceting reference in view of Meyer, 250378, Schenck, D35938 and Schenck, 43724.

Regarding claims 25-44, the Diagrams for Faceting reference discloses a variety of faceting designs for use on precious naturally occurring gemstones. On page 9, the Mogul cut discloses eight rows of crown facets that are cut at varying degrees from a reference plane tangent to the top of the crown. The reference also discloses, on page 16, a pavilion having facets extending from the culet to the girdle. Clearly, there are many ways to cut a stone to bring about an aesthetically pleasing gemstone.

The reference fails to disclose a crown in the shape of symmetrical hemisphere. However, there are a multitude of patents disclosing a crown in the shape of a symmetrical hemisphere with rows of facets cut at varying angles along the outside surface of the hemisphere. See US Design Patents D35938, D43724, and utility patent 250378.

The Diagrams for Faceting discloses a Mogul cut having eight rows of crown facets cut at varying angles, but fails to disclose ten rows of crown facets cut at the specified angles.

It would have been an obvious design choice to a person having ordinary skill in the art to cut ten rows of crown facets at the specified varying angles in order to produce an aesthetically pleasing gemstone.

It also would have been obvious to make the crown in the shape of a symmetrical hemisphere with pavilion facets extending from the culet to the girdle in order to produce an aesthetically pleasing gemstone. The design of the facets for a gemstone is considered to be an obvious design choice since the only thing that changes is the appearance of the gemstone. Furthermore, the applicant has failed to state any criticality with regard to their arrangement of facets on the stone, i.e. the effects that the arrangement has on the color, fire, clarity and/or brilliance of the stone.

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are most in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/613,281

Art Unit: 3677

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack W. Lavinder whose telephone number is 571-272-7119. The examiner can normally be reached on Mon-Friday, 9-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
